

Version Details

Project Name	Fleet
Release Version	5.2.0
Release Date	06/30/25

About the Release

This release includes enhancements and fixes focused on UI stability and ECU data validation. It resolves ECU tile reopening behavior, fixes scrollbar reset issues in Read Info and Dynamic Value screens, and includes Read Info and dynamic value validation with offset conversion for EPS and DCDC modules. A workaround has also been applied for BMS module offset conversion.

Release Highlights

- Read info and dynamic values validated with offset conversion for EPS and DCDC modules.
- ECU tile reopen issue resolved for consistent user experience.

- Scrollbar reset issue fixed in Read Info and Dynamic Value screens.
- Workaround applied for BMS module offset conversion in Read Info and dynamic values.

New Features & Enhancement

S.No	Features & Enhancement	Description
1	Read Info and dynamic value validation	Offset conversion logic checked and verified for EPS and DCDC modules

UI/UX Changes

- Implemented scrollbar reset to top on screen load for Read Info and Dynamic values.
- Enhanced ECU tile behavior to enable accurate re-selection after closure.

Bug Fixes

Bug ID	Description	Resolution
BUG-008	ECU tile did not reopen upon re-selection after navigating back.	Optimized tile state logic to ensure reliable reopening and seamless interaction.

BUG-009	Scrollbar position was not resetting in Read Info and Dynamic Value screens.	Implemented scroll reset functionality to maintain consistent user experience.

Known Issues & Workarounds

Issue ID	Description	Status
Issue-002	BMS Read Info and dynamic values offset conversion validation	Workaround applied

Testing & Validation

- **Testing Performed:**
Unit testing, sandbox testing and smoke testing
- **Test Environment:**
Test bench system

Dependencies & Compatibility

- **Supported Operating System:**
Windows 10 , Windows 11
